

TRADITIONAL  
CZECH GLASS

## Glass *straws*

The glass straws are made of glass that is medically safe and has been tested for any heavy metal or harmful substance leaks. The glass straws have no effect on the taste and release no odours or colors, meaning that they are very easy to maintain. The straws are not dishwasher safe, as there is the risk of powder or gel clinging to the straws' interior cavity. Use the brush included in the packaging to clean them.

### *Warning!*

Preciosa Ornela points out that it is not advisable to bite the glass straws and as such we recommend adult supervision of children under 12.

The straws are only suitable for use with cold beverages. The straws are made of very heavy duty glass, but it is still necessary to handle them as you would any other glass household product.
