COMPOSITE	cca 9,8	YES, ALL	

LAMPWORKING RODS, DIMENSIONS:

According to manufacturing technology from 600 to 800 mm.

Diameters 7 till 9 mm (exceptionally 12 mm).

Tollerancies for machinery production +/- 0,5 mm.

Composition glass due to the character of the production has individual sizes and tollerancies.

PACKING:

Bundles of 10 kg for crystal, black or 5 kg for other colors.

Hobby packing of lampworking rods in amount of 1 kg, lenght approx. 800 mm. It includes a selection of 14 colors. Three variants of hobby packing: transparent, opaque, opal and alabaster.

STOCKING RECOMMENDATION:

Do not expose the glass to the outside weather conditions, surface of the rods is eroding.

COLORS DEFINITION:

Colour shade is always compared to a current sampler card.
